## The Toot Fairy

**Make your own tooting slime with the Toot Fairy's slime recipe!**

### Equipment:

- A medium to large bowl, for mixing
- A spoon or wooden popsicle stick, for stirring
- A narrow cup or jar, for tooting!

### Ingredients:

- Liquid starch (Note: You can make liquid starch from corn starch using recipes online if you don't have liquid starch)
- Water
- 2 bottles of clear glue
- Food coloring (optional)

**Step 1. Empty both bottles of clear glue into a bowl.**

**Step 2. Fill one of the empty glue bottles with water. Add this water to your bowl.**

**Step 3. Mix together for one minute.**

**Step 4. Mix in food coloring of your choice until the color is uniform throughout.**

**Step 5. While stirring, slowly add a small amount of liquid starch (1 teaspoon at a time) until the consistency is that of thick slime.**

**Step 6. Knead or work with the slime with your hands until it's no longer sticky.**

**Step 7. Place your slime in a small jar or cup using your fingers/hand. A narrow cup with tall sides works the best. Friction and air exiting the cup around the slime makes the slime toot when you put your fingers into it.**
